

Premium finishes for pools, ponds, fountains and other aquatic facilities*

LUXAPOOL EPOXY 2 PACK

The premium choice for all new pool and aquatic facilities and can also be used to achieve a beautiful luxury finish in older pools. Luxapool Epoxy is suited to application over both old and new cement render, fibreglass, marblesheen, pebblecrete and sound existing epoxy finishes. Luxapool Epoxy provides a smooth, hard surface which is simple to maintain. Luxapool Epoxy colours are formulated to the highest technical standards and feature a durable luxury finish with improved resistance to chalking, salt water and pool chlorination chemicals. It is algae controlled and safe for use with fish and mammals after proper surface conditioning. *Aquaculture, decorative fish ponds, wildlife sanctuary ponds and marine parks.

POOL WATER CHEMISTRY

- MAINTAIN pH between 7.6 and 7.8
- TOTAL ALKALINITY between 140–160 ppm for light colours, 160–180 ppm for darker colours.
- CALCIUM HARDNESS of 250–300 ppm
- CHLORINE LEVELS at a minimum consistent with good hygiene; <3.0 for Epoxy
- MINIMISE USE OF ACID where possible.
- BRUSH DOWN pool surfaces every 4–6 weeks over the swimming season to maintain a coating of good integrity and thus improve service life. It is good practice to continue to brush down every 6–8 weeks in the off-season.

The above advice is a general guide only.

PLEASE NOTE: All pools vary with respect to surface type, texture and integrity and this will influence the finished coating. Also, climatic and/or weather conditions prior to, during and after the application of Luxapool coatings will affect the finished coating. These variables **MUST** be taken into account.
